Build an Application: Step-by-Step #6

Exercise to Accompany
Sites: Engage Logged-In Users

The Appian Step-by-Step series consists of 12 exercises that accompany the courses in the Appian Developer learning path. Exercises build upon each other. Complete exercises in order and keep the app and all objects until you are done with the project.

Appian Step-by-Step 25.3

Exercise 6: Sites

In this exercise, you will start building a site for Acme Automobile business users—supervisors, registrars, and mechanics—where they will access fleet-related information. This site will include pages for:

- The W#SA Vehicle record list
- The form to add vehicles to the fleet
- The fleet report
- Tasks for supervisors

Create the Site

1. In the **Build** view of your application, click **NEW** > **Site**.

2. In the **Create Site** dialog, configure the following properties:

   - **Name**: Enter W#SA Step-by-Step Acme Auto Site.
   - **Display Name**: Enter Step-by-Step Site.
   - **Description**: Enter Site for Acme Automobile employees.

3. Click **CREATE**.

4. In the **Review Site Security** dialog, click **SAVE**.

Add Pages to the Step-by-Step Site

In this exercise, you will add the first two pages: a page for the W#SA Vehicle record list and a page for adding vehicles to the fleet. You will add more pages in later exercises.

1. Add the W#SA Vehicle record type. Click **ADD PAGE**, and configure the following properties:

   - **Title**: Enter `Vehicles`.
   - **Icon**: In the dropdown, select an appropriate icon.
   - **Type**: Select **Record List**.
   - **Content**: Select the **W#SA Vehicle** record type.
   - Click **ADD**.

2. Add the Add Vehicle to Fleet action. Click **ADD PAGE**, and configure the following properties:

   - **Title**: Enter `Add Vehicle to Fleet`.
   - **Icon**: In the dropdown, select an appropriate icon.
   - **Type**: Select **Action**.
   - **Content**: Select the **W#SA Add Vehicle** process model.
   - Click **ADD**.

3. Click **SAVE**.

4. View your new site. Under **Web Address**, click the **URL**. You can also click **Navigation** ⊞ > **Step-by-Step Site**.

Troubleshooting Resources

Stuck on a step, or need help troubleshooting? Appian provides several support resources that you can use as you build:

1. **Acme Auto Solution Application** - The Acme Auto Solution Application (AS) is the solution to the exercises you are following in the Step-by-Steps. You can use the AS application as a reference tool. Review it to see how specific objects are configured, or test the application to see how the features work from a business user's perspective. This application is preloaded into your workspace. If you do not see it in the list of applications in your workspace, you can deploy it from the App Catalog. Refer to **Build an Application: Step-by-Step #1** for more information on how to use the App Catalog.

2. **[Community Discussions for New Users](#)** - Check out the **New to Appian** thread in Community. Join our community of experts to ask questions and find answers from past discussions.

3. **[Appian Documentation](#)** - Appian's product documentation will provide you with an overview of key Appian features, newest release information, additional tutorials, and helpful patterns and recipes to implement in your app.
